Yes. EPA site assessment (remedial) Nuria Muniz had asked removal assistance in evaluating the site. I participated in site assessment along with MDEQ site assessment team. Did not qualify for a removal. It is being handled by the state. Community group has long standing dispute with the company over the company's not so transparent handling of hazardous waste when they demolished the factory way before EPA got involved.

Hi PC,

Were you involved at all with this site? Did EPA have any activity there?

Our office received a complaint about the company's clean up there, and your name is on an EPA information Request letter to the corporation.

Thanks,
